

# VULCOPLAST

**The Unbeatable Roller Coating Choice  
for Hot Tissue Embossing**

**HANNECARD**  
YOUR ROLLER EXPERT

# VULCOPLAST

**Enhance your hot tissue embossing process with Vulcoplast, the first roller coating solution designed for ultimate bulk generation.**

Our exclusive rubber formula not only enhances bulk but also provides exceptional long-term temperature resistance, ensuring smooth, uninterrupted operations. Experience unparalleled embossing quality and superior thickness control. Plus, with Vulcoplast's robust durability, you can expect a minimum 30% increase in the lifespan of your equipment.

**Experience the Vulcoplast difference:**

- **Ultimate bulk generation:** increases bulk without additional material, resulting to enhanced softness and improved absorption.
- **Unmatched temperature resistance:** withstands extreme heat for extended use, ensuring consistent performance.
- **Minimized downtime:** keeps your production line running smoothly, maximizing efficiency.
- **Superior embossing & thickness Control:** delivers the perfect texture and consistency for your tissues, every time.
- **Extended Lifespan (30% minimum):** reduces costs associated with frequent replacements.
- **Outstanding elastical behavior:** vital for achieving high-quality and detailed embossing.
